DETAILED ACTION

Election/Restrictions

Claims 1-15, 21-23 are allowable. Claims 24-25, previously withdrawn from consideration as a result of a restriction requirement, requires all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between the embodiments in figures 1-4 and 5, as set forth in the Office action mailed on 10/28/05, is hereby withdrawn** and claims 24-25 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Change the title to --Apparatus for Cleaning a Machine Tool--

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The applicant amended claim 1 to include the limitation of a machine tool having a spindle and housing disposed around and spaced from the spindle. There is a first and second cleaning member disposed on a support plate. The support plate is attached to an arbor which is attached to a spindle. The first cleaning member contacts an interior surface of the housing and the second cleaning member contacts the spindle. Hess ('923) teaches a support plate with first and second cleaning members (44-47) extending therefrom, however Hess fails to teach that the cleaning members contact the spindle. The cleaning members of Hess are only capable of cleaning a housing surrounding the support plate. The Dremel reference teaches a cleaning member however only teaches a single cleaning member that is capable of contacting a housing. It would not have been obvious to modify the Hess or Dremel reference so that they teach a first and second cleaning member that is capable of contacting the housing and the spindle, respectively to achieve the claimed invention, since there is no motivation or teaching to do so.

Regarding claim 9, the reasons for allowance have been made clear in the non-final office action dated 9/17/07.

For the reasons listed above, the application is free from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shay L. Karls whose telephone number is 571-272-1268. The examiner can normally be reached on 7:00-4:30 M-Th, alternating F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
